

Prepare for the future, learn online, and differentiate yourself in the marketplace: Become Green Builder® Certified

» Take advantage of our winter special for Level II of Green Builder College! Enroll in Level II by February 15 and receive \$150 off your tuition. Enter the code EEBAHTW.

- » Green Builder College offers the online Green Building Certification Program to building professionals seeking to expand their knowledge about sustainable development. As the housing industry recovers, building professionals will need an evolved knowledge base that will allow them to thrive in the emerging green economy. Green Builder College provides professionals with essential tools to help them access new business opportunities and green collar careers.
- » Position yourself at the forefront of the dynamic green building industry. Green Builder College courses have been developed in partnership with leading industry, green building, and sustainable design experts to address the unique needs of practicing professionals. Students are provided a comprehensive base of information about the principles of building science and the forces that govern building performance and environmental outcomes.
- » Online learning is ideal for the busy professional. Access the comprehensive online curriculum from your home or office computer. Study at your own pace—reviewing content, exploring information, investigating resource materials, and taking tests. Upon completion of the coursework and successful testing, you'll be Green Builder Certified with rights to the widely recognized Green Builder trademark, armed with the information you'll need to make informed decisions to deliver durable, healthy, energy-efficient homes.

Green Builder® College
